My name is Jonas, and I'm the artist and creator of THE ANOMALY. I like to imagine this game as an 'arcade adventure', but with a beautifully stylised and adapted visual aesthetic. As I'm developing the game, I'm going to add more content and features as I go. The long term goal is to make this game a vibrant, unique and interactive experience. It's a free to play 2 player competitive d-class based 'escape room'. The board will be found throughout the SCP Foundation, and there will be several worlds and organisations to be discovered. Players will need to establish relationships with certain SCPs to achieve their goals. THE ANOMALY is a labour of love, with many factors contributing to the development of the game. A large percentage of the development has been done by myself, with help from a few friends and family. If you like the game please keep an eye on the updates section of this page to see the latest versions of the game. I'll be keeping an eye on this as well for any updates and bugs that you encounter. Thanks for checking out the game and for taking a look at my small piece of art and music. View the game on Steam: Features: The mysterious origin of this dimension Anomalous threats Player controlled allies Multiple world types Evidence to gain Collectible objects Customisation Ammunition reloads Puzzle mechanics Animated maps Mechanics that change as the game is played No content has been added to the game yet. I am working on a game title called 'The Anomaly: Genesis' and I am looking for some beta testers. The game is a Sci-Fi rpg like modern day Dark Souls. The aim is to take your character from zero to hero in a quest to save the world. What can you do in the game? Explore a large map and discover items and upgrades to increase your character. Fight against enemies from other dimensions. Dodge attacks and traps. Escort other characters. Maintain your equipment and manage your inventory. Budget your resources wisely. There will be three difficulty settings and an endless mode. I am looking for testers who have time and are willing to help out. I c9d1549cdd

What's new in Animaddicts:

is a PlayStation 2 beat 'em up arcade video game developed by Ah! Entertainment and published by Sega. The game was released in Japan on January 20, 2001, and in the PAL regions on July 1, 2001. Unlike many other beat 'em ups of its genre, the game has a traditional button layout. Plot The BBX 1st Bureau is a special operation co-ordination bureau led by Sardi, who is an operative of Armada. The mission of the BBX 1st Bureau is to defend Earth from the evil organization, the Armada. The members of the BBX 1st Bureau are joined by Sardi, a convicted felon whose proficiency as a martial artist offers him special powers. The game begins with a brief introduction of Captain Regulus and Keri, the main characters' names. Captain Regulus decides to draft the two from the army and head to the Armada's base. Characters Captain Regulus (voiced by Norikazu Mita) Captain Regulus is a tactician who loves to fly in space, and also has a love-hate relationship with Keri. He is the main protagonist who only appears in the opening scene of the game. He can perform the Captain Method used when fighting the Armada, or the backflip recovery kick. His attacks include Exarate, Hell Spawn, the Spin Kick, Spin Attack, Projection Trick, and the 6 Beam Charge. In his ending, after defeating his enemies and securing the safety of the Heliotrope Base, he is seen giving Keri the Love Energy. Keri (voiced by Keiko Hori) Though she is a girl, she is a member of the Armed Forces of America, and is said to be the second in command of Captain Regulus after his promotion as a captain. She also serves as a sidekick and an important member of the team. Her favorite weapon is the Star Driver and her abilities include the gun shooting, instant laser, the powerful punch and the all-powerful body. Her attack using the Star Driver revolves around the circle of light surrounding the ship. In her ending, after defeating her enemies and securing the safety of the Heliotrope Base, she is seen giving Captain Regulus the Space Energy. Sardi (voiced by Takako Kato) It was made known that she was training members of the Armed Forces of America to become an elite operator of the Armada and join the BBX 1st Bureau
