Development AutoCAD was developed using the application development paradigm RAD, which was not well suited for high-quality, long-running software, and was eventually abandoned in favor of ObjectARX.

Although ObjectARX was designed to be used with AutoCAD, it has since become a separate development platform. Former development languages include AutoLISP (Able LISP), Visual LISP, Pascal, C++ and C#. History Origin Autodesk's initial design for AutoCAD involved the use of the D-Flat design language. It was designed to have a strict separation of the specification of data from how that data is displayed. Many users, however, were confused by this design because they were used to the concept of programming GIS data into the program. Development was contracted to Amelco, where a tool was designed to allow development in a D-Flat environment. AutoCAD 1.0 was released in 1988, based on D-Flat. AutoCAD Modeler 1.0 was released in 1989, based on the D-Flat tool. The development environment of AutoCAD changed when Autodesk acquired Inventor, a CAD package that was originally a licensed copy of AutoCAD, but developed for the Macintosh platform. While the data specification for both programs were different, they were designed to work together, and In ca3bfb1094
