the subscription fee is substantial, but the content is rich and diverse. if you are french-only learner, and you love to learn with flashcards, this is a deal worth considering. if you already have a regular subscription to lingopie, this program is a great choice for free. my thoughts for those of you interested in learning french are - look for interactive flashcards. we had no problems in our experiments doing this. make sure that the lesson is a small chunk of the overall program. i highly recommend giving it a try and see what you think. overall the quality of the content is good, but the price is ridiculously high. it is not really speaking any languages that is the issue with the pricing. it is the entirety of the package. and while i must admit that some of the content is to a higher level than i usually need, the quality of the content, as mentioned, is very good. it would have been nice if you could actually try the lessons for free before you have to buy and subscribe. there were no restrictions for students, which makes it appear to be an advertisement. if you have to force someone into subscribing before they can learn for free, you are doing something wrong. the people who do learn for free are the

ones who love the content and are loyal users. i would be careful with the content. i have an old version of yabla, and the italian lessons are actually full of grammar lessons. the pronunciation, though not the grammar, were challenging. a lot of the time when they would play a lot of music, the vocals would go "woah, woah, woah, woah" no matter what you were saying. halfway through my italian course, i realized that some of the pronunciations were wrong, and they just kept doing it. sometimes you will find a lesson to be pretty good, and the rest to be a bit meh. overall, for learning french free, yabla is not a bad choice.

i would recommend a hard drive with at least 20 gb of free space available. you can use the program to learn and practice what youve learned. you can also practice finding vocabulary, spelling and listening comprehension. while the program looks like a video player, it really isnt. thats because the program lets you speak directly to the computer, using voice recognition technology. youll also be able to navigate directly to the french subtitles or the english translation at any time and click on any word to get it instantly in the translation window. a few things to note. if you scroll right or left, or press page up or down, youll get to other parts of the program. if you close the program, youll still be able to access your stored lessons and your shopping cart. you can also go directly to your shopping cart by clicking students will like the program, because there are several learning modes available. for example, you can choose to study the vocabulary by speaking or by reading. you can also study the language by listening to the

program through your headphones. lastly, you can simply watch the videos and have fun. all of this allows you to actively engage with the program, instead of simply watching lectures that you might find boring or might fail to grasp. you can have fun while studying to reach a goal that matters to you. the program offers various learning paths, designed to suit each individual. you'll see some of the different language courses available for free. like the french edition, the english edition of ouino contains a library of free video lessons covering a range of topics and difficulty levels, including topics like nouns, verbs, adjectives and more. 5ec8ef588b
