## **What's New In PCon.catalog For AutoCAD?**

It is a plugin that is used to import commercial symbols and catalogs from the Internet into the AutoCAD drawing, or into the drawings that are already open, through the use of the catalog viewer. More information about the features that the plugin have. The function of pCon.exe is to automatically import a given.dll into the AutoCAD drawing if you press the button on the plugin. This is very useful because it speeds up the import of the.dll and because all the process are automated. PCon.exe is available in 2 editions:

simple and premium. The Premium edition has some important advantages: - Premium edition is much faster than the simple edition - You can choose the extension of the dll you want to import, it can be.dll,.lib or.dll/lib - You can add more extensions to pCon.exe, to customize the importing process. - You have the possibility to insert into the drawing the imported symbols on the top of the coordinates with the current position. - You have the possibility to change the default order of the extensions of the.dll and to choose the extension depending on the default action (drawing, edit, etc.) In addition, with the Premium edition you can create your own symbols within the plugin. As.dll, pCon.exe is easy to install and easy to configure. In addition, pCon.exe allows you to monitor each operation, so that you can easily modify the importing process and can manage your own.dlls. With the Premium edition, you can customize the importing process and the catalogs you want to import. Also, you can create your own symbols in the plugin, importing them in DWG format into the drawing. You can choose the extension of the.dll, the default order of the extensions of the.dll and you can choose the extension depending on the default action (drawing, editing, etc.) Basic functions: - The plugin automatically imports all the commercial.dll you specify inside the drawing. - You have the possibility to insert into the drawing the imported symbols on the top of the coordinates with the current position. - You have the possibility to choose the extension of the.dll. The plugin can import.dll,.lib or.dll/lib - You can add more extensions to pCon.exe, to customize the importing process. - You have the possibility to insert into the drawing the imported symbols on the top of the coordinates with the current position. - You have the possibility to choose the extension of the.dll. The plugin can import.dll,.lib or.dll/lib - You can choose the default order of the extensions of the.dll. - You can choose the default action of each dll. - You can choose the extension depending on the default action of each d
