Adobe Sketch must be the best/most important app of 2017! I´m very happy have bought a 2018. I'm using it for free by only paying for the latest tools I like. It´s amazing I use the ScreenKit in Photoshop to test all my images so quick and this days I´m working. I anno each image with over 300 timestamps during one day. This took me over 30 hours. Every time I work with screenkit many hours are saved... E.g.... create objects. Lights and textures. It´s free if you make only the cilndras or the timestamps... However, if you do any developement. I have a 19" iMac with iMac Pro and now also have a iCloud drive. If I create a project for all my images and timestamps I get 10 times the cloud drive space for free to store my projects in. Great!... So no worries. Just pay for the Adobe optional tools and get safe and a very fast workflow which saves my time. More painful is to use that program for direct use for photo editing, sharpening, resizing, and tilting etc. This is not so hard with Photoshop. Maybe it´s only my readings about the Adobe team. That is why I don´t want to use Photoshop but use Sketch instead.

extra Info Moving on, and rounding off my "5 Things to Know" section, I'll discuss Artisan Pro and other improvements, and lastly the Notes feature. Closing remarks: I'll keep the next part of my review for the new features in Photoshop, but I wanted to bring your attention to the new iOS 9 wallpapers at the very end, in case you really don't know your way to the App Store on your iPad. They are excellent, both in terms of their character and theme, and they really work with your wallpaper collections.
